#INTAN60Tahun

This knowledge sharing session, will provide high-level overview of Industrial Revolution 4.0 and its impact on IT and public sector. The Fourth Industrial Revolution will mark a significant change in the way we work. Made possible by the emergence of digital systems, networked communications, machine learning and Big-Data large-scale data analysis; it refers to the increasing integration of these technologies into business and production processes in order to make them self-sustaining and more efficient.
